

THE SCHOOL BUS FAMILY

THIS FAMILY HAS ALL OF YOUR SCHOOL BUS NEEDS COVERED.

IC Bus is the only partner you'll ever need for your school bus operations. Our school buses have you completely covered by leading the industry in lifecycle cost and engine durability. And they have the one emissions solution that takes the responsibility of compliance completely off of you.

THE CE SERIES SCHOOL BUS

The IC Bus™ CE Series school bus is an industry leader for economical, safe, comfortable and reliable student transportation. Its driver's compartment was designed with ergonomic wisdom, based on actual measurements of 1,500 real drivers, that thoroughly facilitates safe operation, no matter the size of the driver.

Drivers find ample foot room, a high three-piece windshield and driver's side window, as well as optimally located mirrors, which are all designed to increase visibility. Also, the CE Series has a tall and wide entry for increased visibility. Plus, its conventional-style engine compartment makes it easy for the maintainer to service.

Altogether, the CE Series is one of the most comfortable and drivable conventional buses on the market. And the fully integrated CE Series is also available in an industry-leading hybrid configuration.

THE BE SERIES SCHOOL BUS

A small bus built to big bus standards, the BE Series school bus has an integrated body, chassis, engine and warranty. Which means, for one thing, your drivers won't be driving a vehicle built on a van platform. And you'll also be covered with a better lifecycle, as it's built for an industry-leading 12-year life.

Powered by the mighty MaxxForce® 7 engine, it transports up to 30 passengers with ease. The 78" of interior headroom and 158" wheelbase only add to the already big-feeling of the BE Series school bus.

THE RE SERIES SCHOOL BUS

Simple serviceability, thanks to an easy-access side engine door, is just one of the important customer-friendly standard features of the RE Series school bus. Others are its remarkable high-visibility driver's area, its heavy-duty, high-power MaxxForce DT engine and its ability to carry a very high capacity of passengers (up to 84 students).

You'll also find an ergonomically intuitive environment for drivers, highlighted by the forward positioning of the driver, which provides an exceptional line of sight for easy and intuitive monitoring of the road and the surrounding environment. Additionally, the RE Series school bus has an entryway that gives the driver a clear view all the way to the curb.

GOING BEYOND THE BUS, BEFORE, DURING AND AFTER THE RUBBER MEETS THE ROAD.

NAVISTAR CAPITAL

Navistar Capital combines GE Capital's financing strength with Navistar's dealer relationships to offer you a broad, competitive set of financing solutions. Learn more at navistarcapital.com

BUS ISIS® PROGRAM

The all-purpose, online informational service site with virtually every aspect of vehicle information a service technician could ever need. Get instant access to complete vehicle information, product diagrams, service manuals and service history. Plus, the iKNOW troubleshooting search feature provides recommended diagnostic solutions to specific customer questions.

IC BUS™ UNIVERSITY

IC Bus University provides extensive hands-on diagnostic training to help technicians stay up to speed on electronics, engines, bus care and maintenance, transmissions, full-power brake systems and fully integrated air conditioning.

NAVISTAR PARTS AND SERVICE

With the largest dealer network in the industry, IC Bus dealers service all school bus models virtually anywhere, anytime. They also offer recommended parts and expert service to get you back to uptime in no time.

POWERFUL AND RELIABLE DURABILITY: PERFORMING TO THE MAXX.

Every one of our school buses comes with a MaxxForce engine. Built on uncompromised performance, while meeting tough environmental regulations, they're backed by the #1-selling medium commercial diesel engine manufacturer: Navistar Engine Group.

MAXXFORCE® 7

The MaxxForce 7 is an all-new V-8 turbodiesel that incorporates advanced design elements and new components engineered by Navistar. These include a high-pressure, common-rail fuel system, dual-sequential turbochargers and compacted graphite iron block. These features deliver a better performing engine with outstanding power, performance, reliability and fuel economy.

MAXXFORCE DT

The MaxxForce DT has long been known in the industry as "The Legend." The legend grew from a big idea: bring to the mid-range diesel market traditional Big Bore features like wet-sleeve design, in-chassis rebuild capability and other premium design features. The resulting durability and performance provide high residual value and have made the engine the market share leader for decades.
