

Making it easy for you.

Our customized approach to Fleet Diagnostics.

As equipment and technology change the best tools for diagnostics are changing as well. Leonard Bus Sales is committed to advising our partners on the most efficient and cost-effective methods of accessing needed diagnostics information.

Today the best solution is to obtain the software relevant for your fleet a la carte, ensuring that you are only paying for the software that you really need.

All of the software listed below can be downloaded on ANY District purchased laptop, saving thousands of dollars and ensuring that the District's IT department is able to properly monitor, manage, and repair the equipment.

	To Order/Download Software:	Annual Renewal Required	Nexiq Cable Required	Capabilities			
				Health Reports	View / Clear Fault Codes	Diagnostic Capability	Parameter Changes
